

To Whom It May Concern:

We got our solar water heating system installed over a year ago and it is working like a champ, thanks to Jeremy and Sun-Wind Power Inc.

We have been enjoying the hot water during all sunny days and even some cloudy but warm days. The drain-back system seems to be working as expected in winter.

We haven't had any major issues with either the system or the installation so far. The rooftop solar panels look good and many of our neighbors inquired about the system.

We wish Jeremy and Sun-Wind Power Inc all the best in their future endeavors.

Thanks!
